- (4) No person shall provide telecommunications services originating or terminating in the City over Communications facilities which that person controls and which are installed, erected, hung, laid, buried, drawn, emplaced, constructed, reconstructed, maintained, and/or operated in a public right-of-way, without first obtaining an Easement pursuant to the terms of an Easement agreement that provides for fair and reasonable compensation to the City for such use of the public rights-of-way or public property occupied by such Communications facility.
- (5) An Easement or License is required for any portion of any Communications facility that occupies any portion of the public rights-of-way. A Lease is required for any portion of any Communications facility that occupies any portion of any City owned property which is not itself a public right-of-way, e.g., City poles, conduits or buildings, whether or not an Easement or License is also be required because such property is located upon, across, beneath, over or in a public right-of-way. The requirements of this Ordinance apply to any Communications facility located upon, across, beneath, over or in any public right-of-way in the City or other City property on the effective date of this Ordinance, and the owner or operator of such Communications facilities shall have 120 days to comply with the requirements hereof.
- (6) Communications facilities authorized by Easement, License, or Lease under the provisions of this Ordinance may use the rights-of-way and public property only for the purposes set forth in such Easement, License or Lease, and the use or operation of such communication facilities for any other or additional purpose shall require an additional or amended Easement, License or Lease. For example, and without limitation, Communications facilities constructed on the public rights-of-way under a License granted pursuant to this Ordinance may not be used to provide telecommunications service within the City, except upon authority of an Easement granted for that purpose under the terms of this Ordinance.
- (7) The City may grant one or more Easement, License, or Lease in accordance with this Ordinance. Each such Easement, License, or Lease shall be nonexclusive.
- (8) Notwithstanding any other language in Section 1.6, an easement or License is not required to continue to operate any traditional Communications facility that occupies any portion of the public rights-of-way. For purposes of this paragraph, "traditional

Communications facility" means any Communications facility which has been continuously operational for at least the two years immediately prior to the effective date of this Ordinance and which is owned by any Person who has provided telecommunications services continuously within the City for at least the twenty five years immediately prior to the effective date of this Ordinance. The term does not apply to upgrades or replacement of such facilities or to other facilities owned by such Person.

Section 1.6. Work Permit Required

(1) No person, including an Easement-holder, Licensee or Leaseholder shall enter upon the public rights-of-way to engage in excavation and construction activities, the installation or emplacement of Communications facilities, or the reconstruction, repair, maintenance, relocation, operation, disconnection, removal or replacement of any Communications facility except upon the authority of a work permit, as hereinafter provided for, which permit shall describe with particularity, or by reference to the application therefore, the activity authorized, the time or times during which such activity is permitted, and such further terms and conditions as the Director of Engineering may prescribe pursuant to the authority delegated herein.

Section 1.7. Administration

(1) In accordance with this ordinance and pursuant to regulations and procedures promulgated and published by the Council, the Director of Engineering shall issue work permits to authorized Easement-holders, Licensees and Leaseholders in accordance with the authority granted by such Easement, license or Lease, and shall inspect the work authorized by each such work permit.

(2) In accordance with this ordinance and pursuant to regulations and procedures promulgated and published by the Council, the Director of Engineering shall evaluate

Easement applications; recommend to the Council the grant of Easements; and execute such Easement agreements as have been approved by the Council.

(3) Except as otherwise expressly provided in an Easement, License or Lease agreement, each Easement-holder, Licensee, or Leaseholder shall promptly relocate its Communications facilities, upon not less than thirty (30) days written notice from the Director of Engineering, to accommodate construction, reconstruction, improvement or repair of public streets, sidewalks, curbs, drains, sewers, and public improvements of any sort. In the event that, by the nature of the relocation, such relocation cannot be accomplished within the thirty-day period, the Easement-holder, Licensee, or Leaseholder shall notify the Director of Engineering and request in writing that the Director of Engineering grant an extension of time to relocate the Easement-holder's, Licensee's, or Leaseholder's Communications facilities, which request will not unreasonably be withheld. In the event of a public emergency the City, after as much notice to the owner or operator as practicable, may move or remove the facilities at the risk and expense of the owner or operator.

(4) Except as otherwise expressly provided in an Easement, License or Lease agreement, each Easement-holder, Licensee, or Leaseholder shall provide access to poles, antennae and additional or unoccupied conduits, as available, for the installation, attachment or emplacement of compatible Communications facilities on reasonable and non-discriminatory terms and conditions; provided further that any Easement or License which authorizes the excavation of the public rights-of-way may be conditioned upon agreement by the Easement-holder or Licensee to install conduit with such excess capacity as the City may deem necessary or appropriate to minimize repeated excavation of the public rights-of-way and to address the present and reasonably foreseeable requirements of other Easement-holders and Licensees.

(5) Except as otherwise expressly provided in an Easement, License or Lease agreement, the City shall have the right to co-locate proprietary communication facilities upon or within poles, antennae or conduits owned by an Easement-holder, Licensee or Leaseholder without payment therefore, provided that such proprietary communication

(6) The Director of Engineering shall promulgate regulations and procedures which set forth the requirements of License and Easement applications; the fees for filing each such applications; the fees and procedures for conducting such public or administrative hearings in connection with the consideration, grant, denial, renewal and/or termination of Easements and Licenses; and the generally applicable terms and conditions upon which such Licenses and Easements shall be considered, issued, denied, renewed or terminated: provided, however, that the Director of Engineering is further authorized to negotiate such additional terms and conditions in connection with the grant or recommendation of particular Licenses or Easements as may be necessary to protect the public health, safety and convenience in particular circumstances, notwithstanding that such terms and conditions are not generally applicable.

(7) An Easement-holder, Licensee or Leaseholder, or third party using the conduit or capacity of an Easement holder, Licensee, or Leaseholder may provide access to any third party having access to the Easement or License holder's facilities only upon a showing by the third party that it has obtained all required consents.

(8) The Director of Engineering shall enforce the terms and conditions of permits, Licenses, Easements and Leases and other such instruments authorizing the use or occupation of public rights-of-way of the City for Communications facilities and services.

Section 1.8. Terms and conditions of Easements, licenses and Leases

(1) Except as otherwise expressly provided in an Easement, License or Lease agreement, each Easement, License or Lease hereunder shall be for a term of ten years.

(2) Except as otherwise expressly provided in an Easement, License or Lease agreement, each Easement-holder and Licensee shall promptly commence to exercise the privileges and authority afforded by its Easement or License, and shall, three months from the effective date of such Easement or License, and annually thereafter, file with the Director of Engineering, a report under oath describing the status of its authorized activities and/or activities in preparation therefore. If any such report or other available evidence fails to demonstrate occupation of the public rights-of-way substantially as authorized, and the active and ongoing utilization of the subject communication facilities, or diligent preparation therefore, the Director of Engineering may direct the Easement-holder or Licensee to show cause within thirty (30) days, or such greater time as the Director of Engineering may by notice have allowed, why such Easement or License should not be revoked pursuant to Section 1.14.

(3) Except as otherwise expressly provided in an Easement, License or Lease agreement, each Easement-holder, Licensee, or Leaseholder shall promptly relocate its Communications facilities, upon not less than thirty (30) days written notice from the Director of Engineering, to accommodate construction, reconstruction, improvement or repair of public streets, sidewalks, curbs, drains, sewers, and public improvements of any sort. In the event of a public emergency the City, after as much notice to the owner or operator as practicable, may move or remove the facilities at the risk and expense of the owner or operator.

(4) Except as otherwise expressly provided in an Easement, License or Lease agreement, each Easement-holder, Licensee, or Leaseholder shall provide access to poles, antennae and conduits, as available, for the installation, attachment or emplacement of compatible Communications facilities on reasonable and non-discriminatory terms and conditions; provided further that any Easement or License which authorizes the excavation of the public rights-of-way may be conditioned upon agreement by the Easement-holder or Licensee to install conduit with such excess capacity as the City may

deem necessary or appropriate to minimize repeated excavation of the public rights-of-way and to address the present and reasonably foreseeable requirements of other Easement-holders and Licensees.

(5) Except as otherwise expressly provided in an Easement, License or Lease agreement, the City shall have the right to co-locate proprietary communication facilities upon or within poles, antennae or conduits owned by an Easement-holder, Licensee or Leaseholder without payment therefore, provided that such proprietary communication facilities do not interfere with the Easement-holder's, Licensee's or Leaseholder's own use of such poles, antennae or conduits; and provided further that such proprietary communication facilities are not used to provide telecommunications service.

(6) An Easement-holder, Licensee or Leaseholder, or third party using the conduit or capacity of an Easement holder, Licensee, or Leaseholder shall notify the Director of Engineering when it enters into any agreement with a third party, including any affiliate, for use of any pole, antennae or conduit located in or upon the public rights-of-way or other public property, and provide copies of such agreement upon request. Except as otherwise expressly provided in an Easement, License or Lease agreement, each

Easement-holder and Licensee and the affiliates thereof, wherever located, shall maintain books, records, and plant accounts sufficient to document compliance with the obligations of each Easement-holder, Licensee and Leaseholder under the terms of its Easement, License or Lease agreement and under this Ordinance. Such books, records, and accounts shall be maintained and available for inspection for a period of four years; provided, however, that such books, records, and accounts shall be maintained and available during the continuation of any audit by or on behalf of the City commenced during such four-year period or during any dispute or litigation with respect thereto.

(7) The Director of Engineering shall collect the fees authorized hereunder; collect Escrow deposits, and shall audit compliance with the compensation provisions of Easements, Licenses, and Lease agreements.

(8) No Waiver. The failure of the City to insist on timely performance or compliance by any person holding an Easement, License, Lease, or work permit shall not constitute a waiver of the City's right to later insist on timely performance or compliance by that person or any other person holding such an Easement, License, Lease, or work permit.

(9) Any Easement-holder, Licensee, or Lessee shall be required to relocate or remove any installed poles, manholes, conduit and any other appurtenant construction and shall do so at its own cost and expense where it will be in conflict with any City construction that requires the space occupied by the Easement-holder, Licensee, or Lessee. The City will attempt to avoid conflicts but the City will not be required to expend additional funds to avoid conflict. The integrity of gravity utility lines, such as water and sewer, shall remain paramount.

Section 1.9. Annual Fee

(1) The Director of Engineering shall, subject to Council approval by ordinance, resolution or other legislative act, determine from time-to-time, the Annual Fee required for use of the public rights of way under Easement or License for Communications facilities which occupy the public rights-of-way, which determination shall take into account: (a) through (d) below, but shall not be less than (e) through (g).

(a) the market value of the property interest conveyed under an Easement, License or Lease based on what a purchaser willing but not obliged to buy the property interest would pay to an owner willing but not obliged to sell it, taking into consideration all uses for which the property is suited, including its value as a corridor;

(b) the cost of acquiring, improving and maintaining the public rights-of-way and the effect thereon of the use authorized by an Easement, license or Lease;

(c) the present and projected demand for uses of the property which may be impaired or impeded by the grant of an Easement, License or Lease; and

May 2, 2001

(d) the public inconvenience that will be caused by the use of the public rights-of-way or other City-owned property.

(e) each and every entity (hereinafter licensee) that is granted the rights and privileges of the use of the public right(s) of way shall pay a one time administrative fee of fifteen thousand dollars (\$15,000.00). Payment shall be made by depositing five thousand dollars (\$5,000.00) with the Department of Engineering with the initial application and submission of plans. Said amount is nonrefundable. Thereafter and upon (1) acceptance of the City of Newark's terms and conditions regarding such use as outlined in the agreement granting use of the City's rights of way for provision of telecommunications services and 2) Municipal Council approval of said easement agreement, the remaining ten thousand dollars (\$10,000.00) shall be deposited with the Department of Engineering.

(f) as compensation for the use of the public right of way, the licensee shall pay to the City of Newark \$2.50 per linear cubic foot of conduit, conduit banks, vaults, or lines installed or occupied in addition to the five thousand dollars (\$5,000.00). (2) Except as expressly provided in an Easement, License or Lease agreement, no Easement, License or Lease granted hereunder shall be construed to authorize or permit the Easement-holder, Licensee or Leaseholder to install, erect, hang, draw, emplace or construct any aerial Communications facility in, on or above a public right-of-way in which one or more public service providers (electricity, telephone, cable television) or another Easement-holder or Licensee has placed its lines underground; and in no event shall an Easement, License or Lease granted hereunder authorize the Easement-holder, Licensee or Leaseholder to install, erect, hang, draw, emplace or construct any aerial Communications facility which would impede or impair access to the underground equipment of any other authorized occupant of the public rights-of-way, or where the City by ordinance has forbidden any new aerial Communications facility except upon amendment, repeal or variance granted in respect of such ordinance. It shall be the responsibility of each Easement-holder, Licensee or Leaseholder to identify in every application for a work permit each and every location covered by such work permit in which new aerial Communications facilities may be hereby prohibited, and the issuance of a work permit in violation of this section shall not be deemed a waiver of its prohibitions.

(3) No work permit shall be issued except upon demonstrated compliance with the New Jersey One Call program.

(4) Except as otherwise expressly provided in an Easement, License or Lease agreement, each Easement-holder, Licensee, or Leaseholder shall provide access to poles, antennae and conduits, as available, for the installation, attachment or emplacement of compatible Communications facilities on reasonable and non-discriminatory terms and conditions; provided further that any Easement or License which authorizes the excavation of the public rights-of-way may be conditioned upon agreement by the Easement-holder or Licensee to install conduit with in such excess capacity which shall become the property of the City as the City may deem necessary or appropriate to minimize repeated excavation of the public rights-of-way and to address the present and reasonably foreseeable requirements of other Easement-holders and Licensees.

Any Communications facility constructed, maintained, or operated in this City in violation of Section 1.5 or 1.6 is subject to forfeiture; and the City may seize, disable, remove, or destroy such facility upon thirty days advance notice in writing to the owner or operator thereof; provided, however, that where the safety of any person or property lawfully within the public rights-of-way is endangered thereby, such Communications facility may be seized, disabled and removed without notice and the

City shall have no liability for any damage to such Communications facility which occurs when it is seized, disabled or removed.

(3) Penalties. Except as otherwise provided in an Easement, License or Lease agreement entered into pursuant to this Ordinance, upon the breach of an Easement, License or Lease agreement and failure to cure such breach within ten (10) days after written notice thereof by the Director of Engineering, the Easement-holder, Licensee or Leaseholder shall be liable for and shall pay as a penalty, in lieu of actual damages or liquidated damages as may be provided for in an Easement, license or Lease agreement, at the election of the City in its sole discretion, the following amounts per day for each day that such violation remains uncured, which amount shall be paid within ten (10) days of demand therefore. as a penalty:

An Easement or License may be revoked by the City, as provided in Section 1.14 of this Ordinance, upon a determination by the Director of Engineering that a material breach of the Easement or License agreement, or violation of this Ordinance, remained uncured after 30 days written notice thereof or such greater time as the Director of Engineering may by notice have allowed, or upon a determination that the Easement-holder or Licensee has evidenced a clear disregard for its obligations under an Easement or License agreement or this Ordinance by its persistent and repeated breach or violation of such obligations.

(6) All remedies under this ordinance and the Easement, License or Lease are cumulative unless otherwise expressly stated. The exercise of one remedy shall not foreclose use of another, nor shall the exercise of a remedy or the payment of liquidated damages or penalties relieve the holder of an Easement, License or Lease of its obligations to comply with its Easement, License or Lease. Remedies may be used singly or in combination; in addition, the City may exercise any rights it has at law or equity.

Section 1.12. Performance Bond; Insurance

- (1) **Infractions.** Any person who knowingly violates shall be guilty of a civil infraction and shall be fined the amount of \$2000.00 per day for each day that such violation is proven to have occurred or continued. Each day is a distinct and separate violation. - (7) **Construction or Maintenance Violations.** The traffic division of the Newark Police Department may enforce this Ordinance or that are promulgated and published by the Director of Engineering pursuant to this Ordinance to the extent that such regulation

The City will attempt to avoid conflicts but the City will not be required to expend additional funds to avoid conflict. The integrity of gravity utility lines, such as water and sewer, shall remain paramount.

(10) Each insurance policy required hereunder shall provide that coverage may not be canceled or reduced except upon sixty (60) days prior written notice to the Director of Engineering and Corporation Counsel. An Easement-holder, Licensee, or Leaseholder shall not cancel any insurance policy required hereunder without first securing a substitute policy in compliance with this ordinance.

(11) Neither the provisions of this section nor any recovery under the insurance policy hereby required shall be construed to limit the liability of an Easement-holder, Licensee, or Leaseholder for damages arising out of its activities pursuant to any Easement, License, or Lease granted hereunder.

(12) Qualifications of sureties. All insurance policies and bonds required hereunder shall be issued by sureties which are qualified to do business in this State and which are rated A-1 or better by Best's Key Rating Guide, Property/Casualty Edition; and in a form approved by the Corporation Counsel.

Section 1.14. Revocation of Easement or License; termination of Lease

(1) No person shall install, erect, hang, lay, bury, draw, emplace, construct, reconstruct, maintain, and/or operate any Communications facility upon, across, beneath, over or in any Public Right-of-Way in the City to provide telecommunications service within the City without first obtaining an Easement pursuant to the terms of an Easement Agreement that provides for fair and reasonable compensation to the City for the use of the Public Rights-of-Way or other public property occupied by such Communications facility.

(2) No person shall install, erect, hang, lay, bury, draw, emplace, construct, reconstruct, maintain, and/or operate any Communications facility upon, across, beneath, over or in any Public Right-of-Way in the City, for purposes other than to provide Telecommunications service within the City, without first obtaining a License pursuant to the terms of a License Agreement that provides for fair and reasonable compensation to the City for the use of the Public Rights-of-Way occupied by such Communications facility.

(3) No person shall install, erect, hang, lay, bury, draw, emplace, construct, reconstruct, maintain and/or operate any Communications facility upon, across, beneath, over or in any public property in the City, improved or unimproved, which is not itself a Public Right-of-Way, for any purpose without first obtaining a Lease pursuant to the terms of a Lease Agreement that provides for fair and reasonable compensation to the City for the use of the property occupied by such Communications facility. A Lease is required to authorize the occupation of public property.

(4) No person shall provide telecommunications services originating or terminating in the City over Communications facilities which that person controls and which are installed, erected, hung, laid, buried, drawn, emplaced, constructed, reconstructed, maintained, and/or operated in a Public Right-of-Way, without first obtaining an Easement pursuant to the terms of an Easement Agreement that provides for fair and

(6) Communications facilities authorized by Easement, License, or Lease under the provisions of this Ordinance may use the Public Rights-of-Way and public property only for the purposes set forth in such Easement, License or Lease, and the use or operation of such Communications facilities for any other or additional purpose shall require an additional or amended Easement, License or Lease. For example, and without limitation, Communications facilities constructed on the Public Rights-of-Way under a License granted pursuant to this Ordinance may not be used to provide telecommunications service within the City, except upon authority of an Easement granted for that purpose under the terms of this Ordinance.

(7) The City may grant one or more Easement, License, or Lease in accordance with this Ordinance. Each such Easement, License, or Lease shall be nonexclusive.

For purposes of this paragraph, "traditional Communications facility" means any Communications facility which has been continuously operational for at least the two years immediately prior to the effective date of this Ordinance and which is owned by any Person who has provided telecommunications services continuously within the City for at least the twenty five years immediately prior to the effective date of this Ordinance. The term does not apply to upgrades or replacement of such Communications facilities or to other Communications facilities owned by such Person.

Section 1.6. Work Permit Required

(1) No person, including an Easement-holder, Licensee or Leaseholder shall enter upon the Public Rights-of-Way to engage in excavation and construction activities, the installation or emplacement of Communications facilities, or the reconstruction, repair, maintenance, relocation, operation, disconnection, removal or replacement of any Communications facility except upon the authority of a Work permit, as hereinafter provided for, which permit shall describe with particularity, or by reference to the application therefore, the activity authorized, the time or times during which such activity is permitted, and such further terms and conditions as the Director of Engineering may prescribe pursuant to the authority delegated herein.

Section 1.7. Administration

(1) In accordance with this Ordinance and pursuant to regulations and procedures promulgated and published by the Council, the Director of Engineering shall issue Work permits to authorized Easement-holders, Licensees and Leaseholders in accordance with the authority granted by such Easement, License or Lease, and shall inspect the work authorized by each such Work permit.

(3) In accordance with this Ordinance and pursuant to regulations and procedures promulgated and published by the Director of Engineering, the Director of Engineering shall evaluate License applications; negotiate the terms and conditions of License Agreements; execute such License Agreements on behalf of the City; and issue Licenses and renewals thereof; provided, however, that the Director of Engineering shall not deny an application for a License hereunder except upon authority of the Council on a vote taken to approve or reject the Director of Engineering's recommendation that such application be denied.

(4) In accordance with this Ordinance, the Director of Engineering shall negotiate the terms and conditions of Leases and execute Lease Agreements on behalf of the City.

(5) The Director of Engineering shall promulgate regulations and procedures which set forth the requirements of Work permit applications; the fees for filing such applications; and the generally applicable terms and conditions upon which such permits shall be considered and issued or denied, which terms and conditions shall, withal, provide for the protection of existing structures and facilities located in the Public Rights-of-Way; the restoration of such Public Rights-of-Way and structures to their original condition; the protection of the public safety and convenience and the minimum disruption of pedestrian and vehicular traffic; the qualifications of contractors employed by or on behalf of Easement-holders, Licensees and Leaseholders; and the reimbursement of costs and expenses incurred by the City in connection with the work authorized, including but not limited to inspection of the work and public safety and traffic management functions and facilities provided by the City; provided, however, that the Director of Engineering is further authorized to impose such additional terms and conditions upon the grant of particular Work permits as may be reasonably necessary to protect the public health, safety and convenience in particular circumstances notwithstanding that such terms and conditions are not generally applicable.

(6) The Director of Engineering shall promulgate regulations and procedures which set forth the requirements of License and Easement applications; the fees for filing each such application; the fees and procedures for conducting such public or administrative hearings in connection with the consideration, grant, denial, renewal and/or termination of Easements and Licenses; and the generally applicable terms and conditions upon which such Licenses and Easements shall be considered, issued, denied, renewed or terminated; provided, however, that the Director of Engineering is further authorized to negotiate such additional terms and conditions in connection with the grant or recommendation of particular Licenses or Easements as may be necessary to protect the public health, safety and convenience in particular circumstances, notwithstanding that such terms and conditions are not generally applicable.

(7) The Director of Engineering shall enforce the terms and conditions of permits, Licenses, Easements and Leases and other such instruments authorizing the use or occupation of Public Rights-of-Way of the City for Communications facilities and services.

Section 1.8. Terms and conditions of Easements, Licenses and Leases

(1) Except as otherwise expressly provided in an Easement, License or Lease Agreement, each Easement, License or Lease hereunder shall be for a term of ten years.

(2) Except as otherwise expressly provided in an Easement or License Agreement, each Easement-holder and Licensee shall promptly commence to exercise the privileges and authority afforded by its Easement or License, and shall, three months from the effective date of such Easement or License, and annually thereafter, file with the Director of Engineering, a report under oath describing the status of its authorized activities and/or activities in preparation therefore. If any such report or other available evidence fails to demonstrate occupation of the Public Rights-of-Way substantially as authorized, and the active and ongoing utilization of the subject Communications facilities, or diligent preparation therefore, the Director of Engineering may direct the Easement-holder or Licensee to show cause within ten (10) days, or such greater time as the Director of Engineering may by notice have allowed, why such Easement or License should not be revoked pursuant to Section 1.14.

(3) Except as otherwise expressly provided in an Easement, License or Lease Agreement, each Easement-holder, Licensee, or Leaseholder shall promptly relocate its Communications facilities, upon not less than thirty (30) days written notice from the Director of Engineering, to accommodate construction, reconstruction, improvement or repair of public streets, sidewalks, curbs, drains, sewers, and public improvements of any sort. In the event that, by the nature of the relocation, such relocation cannot be accomplished within the thirty-day period, the Easement-holder, Licensee or Leaseholder shall notify the Director of Engineering and request in writing that the Director of Engineering grant an extension of time to relocate the Easement-holder's, Licensee's or Leaseholder's Communications facilities, which permission shall not be withheld unreasonably. In the event of a public emergency the City, after as much notice to the owner or operator as practicable, may move or remove the Communications facilities at the risk and expense of the owner or operator.

(4) Except as otherwise expressly provided in an Easement, License or Lease Agreement, each Easement-holder, Licensee, or Leaseholder shall provide access to poles, antennae and additional or unoccupied conduits, as available, for the installation, attachment or emplacement of compatible Communications facilities on reasonable and non-discriminatory terms and conditions; provided further that any Easement or License which authorizes the excavation of the Public Rights-of-Way may be conditioned upon agreement by the Easement-holder or Licensee to install conduit with such excess capacity which capacity shall become the property of the City as the City may deem necessary or appropriate to minimize repeated excavation of the Public Rights-of-Way and to address the present and reasonably foreseeable requirements of other Easement-holders and Licensees.

(5) Except as otherwise expressly provided in an Easement, License or Lease Agreement, the City shall have the right to co-locate proprietary Communications facilities upon or within poles, antennae or additional or unoccupied conduits owned by an Easement-holder, Licensee or Leaseholder without payment therefore, provided that such proprietary Communications facilities do not interfere with the Easement-holder's, Licensee's or Leaseholder's own use of such poles, antennae or additional or unoccupied conduits; and provided further that such proprietary Communications facilities are not used to provide telecommunications service.

(6) An Easement-holder, Licensee or Leaseholder, or third party using the conduit or capacity of an Easement holder, Licensee, or Leaseholder shall file annually with the Director of Engineering a list of all agreements with a third party, including any affiliate, for use of any pole, antennae or conduit located in or upon the Public Rights-of-Way or other public property, and provide copies of such agreement upon request. Except as otherwise expressly provided in an Easement, License or Lease Agreement, each Easement-holder, Licensee, Leaseholder and the affiliates thereof, wherever located, shall maintain books, records, and plant accounts sufficient to document compliance with the obligations of each Easement-holder, Licensee and Leaseholder under the terms of its

Easement, License or Lease Agreement and under this Ordinance. Such books, records, and accounts shall be maintained and available for inspection for a period of four years; provided, however, that such books, records, and accounts shall be maintained and available during the continuation of any audit by or on behalf of the City commenced during such four-year period or during any dispute or litigation with respect thereto.

(7) No Easement, License, Lease or Work permit shall be construed to estop or limit the City in the full exercise of its governmental powers; and no provision of any Easement Agreement, License Agreement, Lease Agreement or Work permit shall be construed or deemed a waiver or relinquishment of the authority of the City to amend this Ordinance or enact other legislation which may impair, impede or limit the authority granted under any Easement, License, Lease or permit or modify the terms and conditions thereof, unless such provision makes specific reference to this section of this Ordinance and plainly waives or relinquishes such authority, and each such provision shall be narrowly construed to preserve the legislative authority of the City to the extent consistent with such provision.

(8) An Easement-holder, Licensee or Leaseholder, or third party using the conduit or capacity of an Easement-holder, Licensee, or Leaseholder may provide access to the Easement or License or Lease Communications facilities to any third party only upon a showing by the third party that it has obtained all required consents.

(9) The Chief Financial Officer shall collect the fees authorized hereunder; collect Escrow deposits, and shall audit compliance with the compensation provisions of Easements, Licenses, and Lease Agreements.

(10) No Waiver. The failure of the City to insist on timely performance or compliance by any Person holding an Easement, License, Lease, or Work permit shall not constitute a waiver of the City's right to later insist on timely performance or compliance by that Person or any other person holding such an Easement, License, Lease, or Work permit.

(11) Any Easement-holder, Licensee, or Leaseholder shall be required to relocate or remove any installed poles, manholes, conduit and any other appurtenant construction and shall do so at its own cost and expense where it will be in conflict with any City construction that requires the space occupied by the Easement-holder, Licensee, or Leaseholder. The City will attempt to avoid conflicts but the City will not be required to expend additional funds to avoid conflict. The integrity of gravity utility lines, such as water and sewer, shall remain paramount.

Section 1.9. Annual Fee

(1) The Director of Engineering shall, subject to Council approval by ordinance, resolution or other legislative act, determine from time-to-time, the Annual Fee required for use of the Public Rights-of-Way under Easement or License for Communications facilities which occupy the Public Rights-of-Way, which determination shall take into account: (a) through (d) below, but shall not be less than (e) through (g).

(a) the market value of the property interest conveyed under an Easement, License or Lease based on what a purchaser willing but not obliged to buy the property interest would pay to an owner willing but not obliged to sell it, taking into consideration all uses for which the property is suited, including its value as a corridor;

(b) the cost of acquiring, improving and maintaining the Public Rights-of-Way and the effect thereon of the use authorized by an Easement, License or Lease;

July 11, 2001

(c) the present and projected demand for uses of the property which may be impaired or impeded by the grant of an Easement, License or Lease; and

(d) the public inconvenience that will be caused by the use of the Public Rights-of-Way or other City-owned property.

(e) each and every entity that is granted the rights and privileges of the use of the Public Right(s)-of-Way shall pay a one time administrative fee of fifteen thousand dollars (\$15,000.00). Payment shall be made by depositing five thousand dollars (\$5,000.00) with the Department of Engineering with the initial application and submission of plans. Said amount is nonrefundable. Thereafter and upon (1) acceptance of the City of Newark's terms and conditions regarding such use as outlined in the Agreement granting use of the City's Public Rights-of-Way for provision of telecommunications services and (2) Municipal Council approval of said Agreement, the remaining ten thousand dollars (\$10,000.00) shall be deposited with the Department of Engineering.

(f) Annual Fee

i. as annual compensation for the use of the Public Rights-of-Way, each Easement-holder or Licensee, shall pay to the City of Newark, \$1.50 per cubic foot of Communications facilities, including without limitation conduit, conduit banks, vaults, and lines installed or occupied in the Public Rights-of-Way plus the sum of five thousand dollars (\$5,000.00). These amounts shall comprise the Annual Fee.

(ii) the Annual Fee in (i) shall be adjusted upon completion of a study by the City examining the factors in (a) through (d) above. Based on this study the City's Chief Financial Officer shall publish a new Annual Fee. The Annual Fee shall automatically adjust to the new amount thirty days after the date of publication.

(g) Notwithstanding (f) above, an Easement-holder or Licensee who installs or occupies less than 10,000 cubic feet of Communications facilities shall pay the City annual compensation for the use of the Public Rights-of-Way in an amount equal to the greater of either fifteen thousand dollars (\$15,000.00) or the Annual Fee.

(2) All fees, unless otherwise prescribed by regulation, shall be payable on January 15 of every year unless prorated. The Annual Fee shall be prorated for all Easement-holder or Licensees first accessing the City's Public Rights-of-Way during the second through fourth quarters of any year. If the Annual Fee is prorated in accord with this Ordinance, payment of said fee shall be payable on the date when the Department of Engineering has issued all applicable permits. Every year thereafter, the Annual Fee shall become due and payable on January 15. The City of Newark reserves the right to adjust the annual fee every five (5) years in accord with the Consumer Price Index.

Section 1.10. Construction

(1) Each Work permit granted hereunder shall specify, expressly or by reference to the application therefor, a schedule for the Work permitted thereunder, including a beginning date, a completion date, and the hours during which the permitted work may be performed.

(2) Except as expressly provided in an Easement, License or Lease Agreement, no Easement, License or Lease granted hereunder shall be construed to authorize or permit the Easement-holder, Licensee or Leaseholder to install, erect, hang, draw, emplace or construct any aerial Communications facility in, on or above a Public Right-of-Way in

which one or more public service providers (electricity, telephone, cable television) or another Easement-holder or Licensee has placed its lines underground. In no event shall an Easement, License or Lease granted hereunder authorize the Easement-holder, Licensee or Leaseholder to install, erect, hang, draw, emplace or construct any aerial Communications facility which would impede or impair access to the underground equipment of any other authorized occupant of the Public Rights-of-Way, or where the City by ordinance has forbidden any new aerial Communications facility except upon amendment, repeal or variance granted in respect of such ordinance. It shall be the responsibility of each Easement-holder, Licensee or Leaseholder to identify in every application for a Work permit each and every location covered by such Work permit in which new aerial Communications facilities may be hereby prohibited, and the issuance of a Work permit in violation of this section shall not be deemed a waiver of its prohibitions.

(3) No Work permit shall be issued except upon demonstrated compliance with the New Jersey One Call program.

(4) Any grant hereunder does not apply to or authorize work on private property, including work on private streets.

Section 1.11. Enforcement

(1) **Infractions.** Any person who knowingly violates Section 1.5. or 1.6. shall be guilty of a civil infraction and shall be fined the amount of \$2000 per day for each day that such violation is proven to have occurred or continued. Each day is a distinct and separate violation. Where a willful violation occurs such as refusing to the obey an order by the Director of Engineering or his duly designated representative, the applicant officer or owner of the firm may be subject to a term of up to five (5) days in jail for each separate violation.

(2) **Forfeiture of Communications facilities.** Any Communications facility constructed, maintained, or operated in this City in violation of Section 1.5. or 1.6. is subject to forfeiture; and the City may seize, disable, remove, or destroy such Communications facility upon thirty days advance notice in writing to the owner or operator thereof; provided, however, that where the safety of any person or property lawfully within the Public Rights-of-Way is endangered thereby, such Communications facility may be seized, disabled and removed without notice and the City shall have no liability for any damage to such Communications facility which occurs when it is seized, disabled or removed.

(3) **Penalties.** Except as otherwise provided in an Easement, License or Lease Agreement entered into pursuant to this Ordinance, upon the breach of an Easement, License or Lease Agreement and failure either: (1) to cure such breach or (2) to initiate efforts satisfactory to the City to cure such breach within ten (10) days after written notice thereof by the Director of Engineering, the Easement-holder, Licensee or Leaseholder shall be liable for and shall pay as a penalty, in lieu of actual damages or liquidated damages as may be provided for in an Easement, License or Lease Agreement, at the election of the City in its sole discretion, the following amounts per day for each day that such violation remains uncured, which amount shall be paid within ten (10) days of demand therefore as a penalty:

(a) For failure to comply with the requirements of the Work permit: \$1000 per day for each day that such violation remains uncured;

(b) For failure to substantially complete construction in accordance with the requirements of an Easement or License Agreement: \$1000 per day for each day that such violation remains uncured;

(c) For transferring an Easement or License without approval as required hereunder: \$1000 per day for each day that such violation remains uncured;

(d) For failure to make timely payment of compensation required under an Easement or License Agreement: \$1000 per day for each day that such violation remains uncured;

(e) For failure to tender payment of any penalty assessed hereunder within ten (10) days of demand therefore: \$1000 per day for each day that such violation remains uncured.

(4) Injunctive relief. In addition to any other remedies provided hereunder, the City shall be entitled to injunctive relief, or any other remedy available at law or in equity, to mitigate or terminate a violation of this Ordinance or to enforce compliance with an Easement, License or Lease Agreement;

(5) Revocation. An Easement or License may be revoked by the City, as provided in Section 1.14. of this Ordinance, upon a determination by the Director of Engineering that a material breach of the Easement or License Agreement, or violation of this Ordinance, remained uncured after 30 days written notice thereof or such greater time as the Director of Engineering may by notice have allowed, or upon a determination that the Easement-holder or Licensee has evidenced a clear disregard for its obligations under an Easement or License Agreement or this Ordinance by its persistent and repeated breach or violation of such obligations.

(6) All remedies under this Ordinance and the Easement, License or Lease are cumulative unless otherwise expressly stated. The exercise of one remedy shall not foreclose use of another, nor shall the exercise of a remedy or the payment of liquidated damages or penalties relieve the holder of an Easement, License or Lease of its obligations to comply with its Easement, License or Lease. Remedies may be used singly or in combination. In addition, the City may exercise any rights it has at law or equity.

(7) Construction or Maintenance Violations. The traffic division of the Newark Police Department may enforce this Ordinance or regulations that are promulgated and published by the Director of Engineering pursuant to this Ordinance to the extent that such regulations govern an activity that is occurring within the City's Public Rights-of-Way. The traffic division may impose any penalty as it is empowered to impose under Section 10.12 of the Newark City Code for a violation of this Ordinance or regulations that are promulgated and published by the Director of Engineering pursuant to this Ordinance.

Section 1.12. Performance Bond; Insurance

(1) No Easement, License, or Lease shall be valid until the Easement-holder, Licensee, or Leaseholder, shall have filed with the Director of Engineering a bond or letter of credit to guarantee performance of the obligations of the Easement-holder, Licensee, or Leaseholder under this Ordinance and under the Easement, License, or Lease Agreement. The amount of the bond or letter of credit shall be provided in the Easement, License, or Lease Agreement, or by reference to the application therefore, or as provided in separate title of this Ordinance, but shall in no event be less than the cost of removal of the Communications facilities authorized by such Easement, License, or Lease, and the restoration of the Public Rights-of-Way to its original condition.

(2) Such bond or letter of credit shall be obtained at the sole expense of the Easement-holder, Licensee or Leaseholder and remain in effect for the full term of the

Easement, License or Lease, and for six (6) months following its expiration or termination: provided, however, that the amount of such bond or letter of credit may be reduced upon application by the Easement-holder, Licensee, or Leaseholder after substantial completion of the excavation and construction activities, and the installation or emplacement of Communications facilities authorized by the Easement, License, or Lease, to such amount as may be necessary or appropriate to guarantee the performance of the Easement-holder's, Licensee's, or Leaseholder's future obligations under this Ordinance and/or the Easement, License, or Lease granted hereunder, as may be finally determined by the Director of Engineering, but in no event less than the cost of removal or remediation of the Communications facilities authorized by such Easement, License, or Lease, and the restoration of the Public Rights-of-Way to its original condition.

(3) The bond or letter of credit shall provide for not less than sixty (60) days' prior written notice to the Director of Engineering and Corporation Counsel prior to cancellation, expiration, or material alteration of its terms.

(4) The Easement-holder, Licensee, or Leaseholder and its surety or issuer shall be jointly and severally liable for any damages or loss suffered by the City, including statutory damages, or penalties assessed hereunder, as a result of a breach of an Easement, License, or Lease Agreement or violation of this Ordinance, including the full amount of any compensation, indemnification or cost of removal of any property of the Easement-holder, Licensee, or Leaseholder, and a reasonable allowance for attorneys' fees and costs, up to the full amount of the bond.

(5) Recovery by the City under such bond or letter of credit shall not excuse an Easement-holder's, Licensee's, or Leaseholder's obligation to cure a continuing breach of an Easement, License, or Lease Agreement, or violation of this Ordinance; nor excuse the future faithful performance by the Easement-holder, Licensee, or Leaseholder under the terms of such Easement, License, or Lease Agreement, or this Ordinance; nor limit the liability of the Easement-holder, Licensee or Leaseholder for damages or loss, actual or statutory, or penalties assessed hereunder to the extent they are not satisfied by such bond or letter of credit.

(6) The rights of the City under any bond, letter of credit or other security fund are in addition to all other rights of the City whether reserved by this Ordinance or authorized by other law or the Easement, License, or Lease Agreement, and no action, proceeding or exercise of a right with respect to such bond or letter of credit will affect any other right the City may have.

(7) Each Easement-holder, Licensee, and Leaseholder shall maintain throughout the term of the Easement, License, or Lease, any renewal thereof, and for six (6) months thereafter, comprehensive general liability insurance in such amount as may be required under the terms of the Easement, License, or Lease Agreement, or by reference to the application therefore, as determined necessary and appropriate by the Director of Engineering and Corporation Council to cover property damage and personal injury which may be foreseeable in connection with the activity authorized by the Easement, License, or Lease. A certificate of such insurance shall be filed with the Director of Engineering in form satisfactory to the Corporation Counsel, and a copy of the policy shall be provided to the Corporation Counsel upon request.

(8) Each insurance policy required hereunder shall provide that coverage may not be canceled or reduced except upon sixty (60) days prior written notice to the Director of Engineering and Corporation Counsel. An Easement-holder, Licensee, or Leaseholder shall not cancel any insurance policy required hereunder without first securing a substitute policy in compliance with this Ordinance.

July 11, 2001

(9) Neither the provisions of this section nor any recovery under the insurance policy hereby required shall be construed to limit the liability of an Easement-holder, Licensee, or Leaseholder for damages arising out of its activities pursuant to any Easement, License, or Lease granted hereunder.

(10) Qualifications of sureties. All insurance policies and bonds required hereunder shall be issued by sureties which are qualified to do business in this State and which are rated A-1 or better by Best's Key Rating Guide, Property/Casualty Edition; and in a form approved by the Corporation Counsel.

(11) An Easement, License, or Lease Agreement may require that each insurance policy name as additional insureds the City of Newark, its officers, the Director of Engineering and such other employees assigned to the project, and/or any board, commission, agency, or other authority, and the members, officers, agents, and/or employees thereof. The insurance shall provide for competent outside legal representation, expenses, salary and such other costs incurred or that are necessary to provide a proper legal action for any charge arising out of the prosecution of any work included for the installation, operation or maintenance of any part of the Communications facilities governed by this Ordinance.

Section 1.13. Transfers and assignments

(1) An Easement or License is a privilege that is held in the public trust and personal to the original Easement-holder or Licensee. Except as expressly provided in an Easement or License Agreement, no Easement or License may be transferred, and no Agreement thereon shall become effective, except upon application to and express approval by the Council. Upon assumption of ownership or control of Communications facilities authorized under this Ordinance without such approval, the transferee shall have violated Section 1.5. of this Ordinance and be subject to sanctions and penalties therefore in addition to whatever sanctions penalties are imposed upon the authorized Easement-holder or Licensee for violation of this section.

(2) For purposes of this section a "transfer" is defined as including, but not limited to, the sale, assignment, hypothecation, pledge or other conveyance, direct or indirect, de jure or de facto, of an Easement or License, or any interest therein, or the ownership or operational control of Communications facilities authorized thereunder, or the delegation of any right, authority, responsibility or duty attendant thereto; or the sale, assignment, hypothecation, pledge or other conveyance, direct or indirect, de jure or de facto, of an existing or newly created equity interest in the Easement-holder or Licensee which results in the creation or increase of 20 percentage points or more in the equity or voting interest of any person, or combination of persons acting in concert.

(3) At least 120 calendar days prior to the effective date of a transfer or delegation, or as otherwise provided in an Easement or License Agreement or other section of this Ordinance, the Easement-holder or Licensee shall submit to the Director of Engineering an application for approval of the transfer or delegation, in such form as the Director of Engineering and Corporation Counsel may require, disclosing the legal, financial, technical, and other qualifications of the transferee to safely and appropriately perform the duties of the Easement or License, and such further information as may be required under applicable regulations, a particular Easement or License Agreement, other section of this Ordinance, or by the Corporation Counsel or designee with respect to a particular transfer.

Section 1.14. Revocation of Easement or License; termination of Lease

- (1) An Easement or License may be revoked by the Council upon the recommendation of the Director of Engineering upon the grounds set forth in Sections 1.8.(2) and 1.11.(5).
- (2) The Director of Engineering shall provide written notice to the Easement-holder or Licensee that the Easement or License is subject to revocation, which notice shall forth the basis for such revocation, provide the Easement-holder or Licensee not less than ten (10) days to show cause why such Easement or License should not be revoked, and advise the Easement-holder or Licensee of its right, within not less than ten (10) days, to demand an administrative hearing.
- (3) The Director of Engineering shall preside over such administrative hearing as may be demanded by the Easement-holder or Licensee, or deemed necessary and appropriate by the Corporation Counsel.
- (4) Following expiration of the time allowed for the Easement-holder or Licensee to show cause why the Easement or License should not be revoked, and such administrative hearing as may be conducted hereunder, the Director of Engineering shall determine whether to recommend to the Council the revocation of the Easement or License. A recommendation to revoke an Easement or License shall set forth the findings of fact and conclusions of law upon which the recommendation is based; and shall be transmitted to the Council, with a copy provided to the Easement-holder or Licensee.
- (5) The Council shall give not less than fifteen (15) days notice of its intention to consider the recommended revocation at a special or regular meeting of the Council, and the Easement-holder or Licensee shall have ten (10) days, or such greater time as the Council may allow, to respond in writing, together with documentary evidence and affidavits, to the recommendation of the Director of Engineering.
- (6) The recommended revocation shall be considered by the Council at the noticed meeting or any subsequent meeting to which the matter is by motion continued. At such meeting the Easement-holder or Licensee may appear by representative to address the Council regarding the recommended revocation, and the Council may also recognize and hear the Director of Engineering and such members of the public as it deems useful, necessary or appropriate, and may thereafter determine, by written resolution or other form of decision, to revoke the Easement or License based on the recommendation of the Director of Engineering and other evidence in the record, and such resolution or other form of decision shall set forth the particulars of the breach of the Easement or License Agreement or violations of the Ordinance which is the basis for the revocation.
- (7) Any Easement or License shall terminate automatically by operation of law one hundred twenty (120) calendar days after an assignment for the benefit of creditors or the appointment of a receiver or trustee to take over the business of the Easement-holder or Licensee, whether in a receivership, reorganization, bankruptcy assignment for the benefit of creditors, or other action or proceeding, however denominated. Upon timely demand of the Easement-holder or Licensee or assignee, receiver, or trustees, as the case may be, the Director of Engineering shall hold a public hearing and make a recommendation to the City Council on retroactive reinstatement of an Easement or License terminated under this subsection if, within the 120-day period following termination under this subsection:
 - (a) the assignment, receivership, or trusteeship is vacated; or
 - (b) the assignee, receiver, or trustee has fully complied with the terms and conditions of this Ordinance and the Easement or License Agreement and has executed an

July 11, 2001

agreement, approved by the court having jurisdiction, assuming and agreeing to be bound by the terms, and conditions of the Easement or License, with any changes reasonably deemed necessary by the City.

(8) The City may revoke the Easement or License if there is a foreclosure or other judicial sale of any of the Communications facilities, equipment or property of an Easement-holder or Licensee, including the Easement or License, by serving notice on the Easement-holder or Licensee and its successor in interest to such property. The Easement or License and all rights and privileges of the Easement or License will be revoked thirty days after the City serves notice under this subsection unless:

- (a) the City has approved a transfer of the corresponding Easement or License;
- (b) the successful bidder has agreed with the City to assume and be bound by the terms and conditions of the Easement or License, with any changes reasonably deemed necessary by the City; and
- (c) the provisions of Section 1.13. (transfers and assignments), to the extent applicable, have been complied with.

(9) Each Easement, License, and Lease Agreement under this Ordinance shall be deemed to be executory for the purposes of bankruptcy, insolvency laws and condemnation.

(10) Except as otherwise expressly provided in an Easement, License, or Lease Agreement, or other section of this Ordinance, upon the revocation or termination of an Easement, License or Lease, the City, by order of the Council, may seize the Communications facilities authorized under such Easement, License or Lease in satisfaction of any damage or loss incurred or penalty assessed by the City in respect of the acts or omissions of the Easement-holder, Licensee, or Leaseholder, including, but not limited to, costs associated with the removal of such Communications facilities, restoration of the Public Right-of-Way to its original condition, and legal and administrative costs incurred in connection with the revocation or termination of the Easement, License or Lease; or the City, by order of the Council, may order the removal of such Communications facilities at the expense of the Easement-holder, License, Leaseholder, or surety therefore.

Section 1.15. Application for Easement or License

(1) An application for an Easement or License under this Ordinance must be submitted to the Director of Engineering on a form supplied by the City and include at a minimum:

- (a) The name, address, and telephone number of the applicant;
- (b) The name, address, and telephone number of a responsible person whom the City may notify or contact at any time concerning the applicant's Communications facilities;
- (c) An engineering site plan, in format and medium approved by the Director of Engineering, showing the proposed locations and volumes of the applicant's Communications facilities, including any manholes or overhead poles, the size, type and proposed depth of any conduit or other enclosures, and the relationship of the system to all existing poles, utilities, sidewalks, pavement, Communications facilities, and other improvements within the Public Rights-of-Way;
- (d) The technical standards that the applicant proposes to follow in construction and operation of the Communications facilities; and

(e) Any additional information the City may require related to management and compensation for use of the Public Rights-of-Way. To the extent that the applicant proposes to resell the services of, or lease existing Communications facilities of, another Easement-holder or Licensee under this Ordinance, the application may omit the data required under paragraph (3) of this subsection.

(2) If the information in an application is incomplete or if the proposed use of the Public Rights-of-Way is inconsistent with the requirements of this Ordinance, the application may be returned as unacceptable for filing.

(3) In evaluating an application, the Director of Engineering must consider, subject to limitations of applicable law:

(a) The applicant's technical, financial, and legal qualifications to construct and operate Communications facilities subject to subparagraph (f), below; provided, however, that any finding by the New Jersey Board of Public Utility Commissioners shall be prima facie evidence of such qualifications;

(b) The nature of the proposed Communications facilities and equipment;

(c) The applicant's recent performance record of operating Communications facilities in other communities, if any;

(d) The ability of the applicant to make efficient use of the Public Rights-of-Way and justify any inconvenience of the public attendant thereon;

(e) The effects of a grant of an Easement or License on the present and future use of the Public Rights-of-Way, including any foreclosure of future uses of the Public Rights-of-Way; and

(f) Such other factors as the Director of Engineering may deem relevant to the City's interests in the Public Rights-of-Way, but the Director of Engineering must not consider, in evaluating the application: (i) the fact that the applicant, or a person with whom the applicant has been associated, is or was a debtor in a case under the United States Bankruptcy Code or former Bankruptcy Act; (ii) the fact that the applicant, or a person with whom the applicant has been associated, is or was insolvent before or during the applicant's or person's case under the United States Bankruptcy Code or former Bankruptcy Act before the time discharge is or was granted or denied; or (iii) the fact that the applicant, or a person with whom the applicant has been associated, has not paid a debt that is dischargeable in the applicant's or person's pending case under the United States Bankruptcy Code or discharged in the applicant's or person's prior case under the Bankruptcy Code or under the former Bankruptcy Act.

(4) Based upon the application, other material presented by the applicant, and any other information relevant to the application, the Director of Engineering must propose to grant, with or without conditions, or to deny, the Easement or License application and must so notify the applicant of the proposed grant or the proposed denial of the application.

(5) If the Director of Engineering proposes to grant an Easement or License application, the Director of Engineering and the applicant must agree on the terms of the Easement or License Agreement within 60 days from the notice of the proposed grant specified in subsection (4) of this section. This period may be extended for good cause by the Director of Engineering. If agreement is not reached within 60 days and the period is not extended, the notice of proposed grant is void.

(6) After complying with the requirements of this section, the Director of Engineering must submit a recommendation to grant an Easement or License and approve the proposed Easement or License Agreement, or a recommendation not to grant an Easement or License, to the Council. The Council must approve or disapprove the proposed grant and Agreement.

(7) Every grant of an Easement or License is subject to an administrative fee in an amount sufficient to reimburse the City for its costs in considering the application as set forth in Ordinance 6-S&F-F approved May 19, 1999. If the administrative fee is not paid within 30 days of the date the City notifies the approved applicant of the amount, the grant is void.

(8) Before the Easement or License is effective, the approved applicant must demonstrate to the satisfaction of the City compliance with the bond, insurance, and similar provisions of the Easement or License Agreement.

(9) Each applicant shall be a member of the underground locator service at 1-800-272-1000 known as New Jersey One.

Section 1.16. Private communications circuits

Upon approval by the Director of Engineering of an application in proper form, the City shall issue a License to any person demonstrating a need in the course of its business to emplace or operate private communications lines in the Public Rights-of-Way to facilitate communications between or among its places of business.

Section 1.17. Tower Leases on City Property

(1) Upon recommendation of the Director of Engineering, and subject to the City's zoning regulations and procedures, the City may enter into with telecommunications providers and other radio users, Leases for appropriate tower sites, antenna space on towers and other supporting structures, and for accessory buildings on City property. Such Leases shall contain commercially reasonable provisions protecting the interests of the City and shall be for terms of not longer than five years. Towers shall not be permitted in any residential zone nor on a structure used for residential purposes. Private antennas shall be limited to use by the owner or perpetual tenant of any property. All other antennas shall be constructed on property owned by the City. Each proposed antenna site applicant shall apply for a Lease from the City. Applications may be made to the Director of Engineering who will review the application and make a recommendation to the Administration.

(2) Each Leaseholder shall be responsible for obtaining in a timely manner at its own expense any required approvals for its antenna or antenna structure from the Federal Aviation Administration or the Federal Communications Commission, or the successors of either, any required zoning from the City, and any building or electrical permits and inspections from the City.

(3) On any antenna structure which is not occupied by a City-owned antenna already subject to the tower registration, lighting, and aeronautical painting requirements of the Federal Aviation Administration or the Federal Communications Commission, or the successors of either, the Leaseholder shall be financially responsible for the tower registration, lighting, and aeronautical painting requirements applicable to its antenna and/or supporting structure.

Section 1.18. Transitional provisions for existing Communications facilities

July 11, 2001

(1) The operator of any existing Communications facility, the operation of which is required to obtain an Easement or License under this Ordinance, shall have three months from the effective date of this Ordinance to file one or more applications for an Easement or a License under this Ordinance. Any operator filing such an application shall not be subject to a penalty under Section 1.11. hereof for failure to have such an Easement or License for that period during which said application remains pending.

(2) Any person holding an outstanding Easement from the City to provide telecommunications services may continue to operate under the existing Easement to the conclusion of its present term (but not any renewal or extension thereof); provided, however, that such Easement-holder may elect at any time to apply for a superseding Easement or License under this Ordinance.

(3) Any Leaseholder under a Lease from the City for an antenna site -- valid and in force on the effective date of this Ordinance -- may continue to occupy such antenna site to the conclusion of the term of the Lease (but not any renewal or extension thereof), in accordance with the terms of such Lease; provided, however, that such Leaseholder may elect at any time to apply for a superseding Lease under this Ordinance.

Section 1.19. Severability

The provisions of this Ordinance are severable. To the extent any clause, phrase, paragraph or provision of this Ordinance shall be declared invalid, illegal or unconstitutional, the remaining provisions shall continue in full force and effect.

Section 1.20. The following Ordinance is repealed

Ordinance 6-S & F-F , May 19, 1999 is repealed, provided however that Sections 3 and 4 of Ordinance No. 6-S & F-F shall remain in effect until such time as the Director of Engineering promulgates the Annual Fee pursuant to Section 1.9.(1) of this Ordinance.

July 11, 2001

To: Robert P. Marasco
City Clerk

From: Chief Anthony Ambrose
Acting Police Director

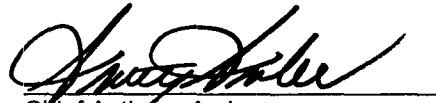

Re: **Resolution-Unmarked Police Vehicles**

Reference is made to the attached Resolution for the purchase of unmarked and non-traditional police vehicles awaiting action on the Municipal Council agenda today.

Please be advised that the thirteen (13) unmarked vehicles will be assigned to the District Commands, the Criminal Investigation Division and NITRO for use by investigative personnel. The two (2) Crown Victoria LX sedans will be assigned to the Police Director and myself. The sports utility vehicles and the mini-van will be utilized by the Professional Standards Unit to conduct drug and gang surveillance since traditional police vehicles, even when unmarked, are familiar and recognizable to the public and compromise intelligence-gathering efforts.

Funds for these vehicles have been certified from the 1999 Local Law Enforcement Grant which expires on September 30, 2001. The inability to proceed with this purchase, will likely result in the Police Department being required to return these much needed grant dollars since we will be unable expend the funds in a different manner by the grant deadline.

Your immediate attention to this matter is greatly appreciated.

Chief Anthony Ambrose
Acting Police Director
